1 Overview

1.1 *About the Webster's American Family Dictionary*

The first Modern American dictionary to cover the Bible and contemporary language

A PDA dictionary program, featuring the **Webster's American Family Dictionary**. The aim of the **Webster's American Family Dictionary** is unique and challenging: it is to capture and record the standard vocabulary of American English in a way that reflects the common ethical, moral, religious, social, and civic values of mainstream Americans. It is, in short, both a lexical and cultural record of standard American English at the dawn of the 21st century.

A family reference that goes beyond removing offensive language, **Webster's American Family Dictionary** reflects the language and cultural values of most American families. While remaining inclusive enough for use through the college level, this new dictionary also covers special categories that are not typically treated in other standard dictionaries, such as the Bible, religious notables, cultural literacy, American history and civics, American folklore, popular proverbs and sayings.

"I applaud this . . . value-centered, family-oriented dictionary."

The Reverend Billy Graham

1.3 How to use the Webster's American Family Dictionary

The **Webster's American Family Dictionary** comes with the distribution file as a database file (.pdb) file, which is not an application itself. In order to use it, you need to install a software application which supports it on your Pocket PC PDA.

Use **Webster's American Family Dictionary** with the following Pocket PC PDA applications:

1.3.1 DEPReader

Dictionary and Encyclopedia Personal Reader (DEPReader) is dictionary software program for PDAs, included as a bonus part in the distribution package of different dictionary and reference databases. **DEPReader** is not a dictionary or encyclopedia itself, you need a database to run the application.

Supporting multiple dictionary databases in an exclusively compressed format, it allows you to carry your favorite dictionaries on PDA everywhere.

In addition to the standard lookup function, **DEPReader** supports other search modes - phonetic, wildcard, error tolerance - to help you find a word or compound even when you do not know the exact spelling. One-tap lookup of words found in the dictionary definitions is provided.

DEPReader allows you to view the cross references available in the dictionary entries. When using a Bible dictionary and a Bible translation compatible with other GMPSoft's products, **DEPReader** allows immediate Bible verse look-up of the verse cross references via pop-up function.

DEPReader may be personalized by customizing its layout, it allows the addition of personal user notes and bookmarks to the dictionary entries.
